Safety instructions – Visitors

site: **Sanitärtechnik Eisenberg GmbH**
 Am Bahnhof 20
 96472 Rödental

General informations

- For your safety, it is essential to follow the instructions of your contact person.
- Please observe the general operating regulations, e.g. smoking island, alcohol ban, cell phone ban in the production area.
- Photography is prohibited.

General safety instructions for fire protection, escape and rescue routes

- Pay attention to the escape and rescue routes that you have to use in an emergency. It is essential to follow the instructions in the escape and rescue plan and, if applicable, the alarm plan.
- Go to assembly point
 - Green area in front of building 1

First Aid

- First aid kits are marked on escape and rescue route plan
- Locations of Automated external defibrillators (AED)
 - Hall 2 entrance left
 - Hall 9 entrance right
 - opposite postal packing station in the warehouse

Personal protective equipment

- high-visibility vest
- The issued PPE must be returned after the end of the work.
- During the production tour we recommend wearing safety shoes min. S1P or safety caps.
- For guided groups of visitors, it is not mandatory to wear safety shoes. In this case, high-visibility vests must be worn.

Moving around the factory premises

- Attention on traffic routes, use marked green paths. Watch out for the blue dots on the ground. They indicate that a forklift is approaching.
- Use the attached mirrors to be able to see unclear places.
- Always keep 3m distance to operating forklifts, show consideration.
- Do not step into the working area of moving industrial trucks.

Miscellaneous

- Observe safety signs (mandatory signs, prohibition signs, warning signs, hazardous substance symbols).
- Do not enter work areas without authorization.

Pandemic

- If necessary, separate infection protection rules are required depending on the current infection situation.
